

# NEW FEATURES NOW AVAILABLE

## About QuickDesign

QuickDesign is a free, browser-based integrated design program that allows you to take your idea from product specification to design using drag-and-drop, point-and-click tools.

## Try it out

If it's been a while since you've logged on or are a new user, we invite you to give QuickDesign a try!

### 1 **Faster Quick Release Couplings**

An initial offering of Faster quick release couplings can now be configured in your custom integrated package.

### 2 **T-382A Cartridges**

QuickDesign can now accept submittals including T-382A valves; CSZN and CXZA cartridge models are now available to integrate into your project. (Sun's tiniest cartridges!)

### 3 **Improved Orifice Handling**

Increased location choices and varying cavity depths allow you to put cavities where you need them.

### 4 **Standard Product Circuits**

Standard manifold and solution circuits are now available for copying and adjusting to your needs.

### 5 **T-18AU and T-19AU Cavities**

QuickDesign now offers T-18AU and T-19AU optimized cavities, designed with larger port sizes allowing reduced pressure drops.
