# Take your next great idea...

## If you can imagine it, we'll help you build it

Sun Hydraulics has what you need to turn your next concept into reality. We offer easy access to our world-class design and manufacturing resources, and we can build a solution just for you based on our high-quality, reliable cartridge valves and innovative 5-axis machining processes. You get compact manifolds with fewer construction plugs and more efficient flow paths using industry-leading valve technology from Sun Hydraulics.

Your trusted, reliable source for cartridge valves is also your go-to resource for hydraulic solutions.

# ...turn it into a great design...

## Design it yourself

QuickDesign with SmartConnect– Sun's free web-based automated design tool – provides drag-and-drop simplicity in a robust schematic capture tool. You get the tools you need to create an integrated package design and request a quote in a matter of minutes. It's the shortest distance from concept to solution.

## Let us design it for you

Our global applications design engineers provide engineering assistance and design evaluation, leveraging our 5-axis machining capabilities to produce optimized designs for more complex, high-volume applications. Working with a Sun engineer, you can get even more from your integrated package.

## Choose an off-the-shelf solution

Sun offers hundreds of off-the-shelf assemblies aimed at providing efficient, effective solutions for common functions. Winch control, fan drive control, priority flow control and a wide range of standard manifold solutions can meet system needs with the click of a mouse. And we customize any of our solutions to meet specific application requirements.

...build it right with  
quality components...

### Solve the puzzle

With a solid reputation of providing reliable, high-performance valves and a global network of engineering and applications specialists, Sun has the products and the know-how to address your most demanding applications and solve the most difficult of hydraulic puzzles no matter where you go. Our state-of-the-art electro-hydraulics and proven hydraulic control designs cover a huge range of needs in mobile and industrial markets.

# ...and turn it into a great solution

## Finish what you started

Whether you start with a napkin sketch, a QuickDesign schematic or a fully realized design, Sun Hydraulics can help you finish what you started and turn your concept into an integrated package solution.

If you have a concept to test, a design to optimize, or a high-volume production run to move quickly out to your customers, we should talk. Our global team of application specialists can deliver smart hydraulic solutions for demanding applications in any end market.

# Global reach. Local support.
